WE ARE HERE TO HELP

- Are you experiencing challenges with your child and you need help connecting with services and resources?
- Has your child received a behavioral health diagnosis?
- Do you need help coordinating existing services?
- Do you need someone to advocate for you and provide support in the home, school, and community?

THE REFERRAL PROCESS

- A Case Manager or other behavioral health care provider will help you complete a referral form and submit it to our offices
- A service request form will be submitted to Community Behavioral Health within 24 hours of receipt
- In 1 to 3 days your child will be authorized to receive case management services

**Children's
Blended Case Management**

"Family is the most important thing in the world!"

WHAT THE CONSORTIUM'S CHILDREN'S CASE MANAGEMENT CAN DO FOR YOU!

What is Blended Case Management

Children's Blended Case Management (CBCM) connects children 6 to 18 years old to services and resources that will help them in their growth and development in the home, school, and community settings. Once connected the case manager collaborates with those service providers to make sure the parents and the child are satisfied and that the services are working! We provide that extra support children sometimes need and we advocate for the parent and the child to help them achieve their goals!

Children's Blended Case Management at The Consortium Is Special!

The Consortium's CBCM program is special because we have several evidenced-based children's programs that we have direct access to and can quickly and easily connect our members with. Family Functional Therapy (FFT); Children's Outpatient Services (COP), and Family Based Services (FBS) are all part of The Consortium's choices of programs that are available to help children succeed! We also have direct access to other Consortium programs for adults like Adult Outpatient Services, and The Greenhouse Employment Program. We also have funds available to help with things like school uniforms, hygiene products, and other everyday essentials as soon as you join us!

If you or someone you know is suicidal, in emotional distress, or need crisis intervention, CALL 988. Trained crisis workers are available to talk 24 hours, 7 days a week.

The Role of the Blended Case Manager

- Evaluate the needs of the member AND the family
- Develop a service plan specific to each member and family, where goals are set and a plan is made to meet those goals
- Connect the family to any and all available resources they may need
- Collaborate with the service providers on the members' progress and satisfaction
- Meet the family where they are; whether in the home, school or community. You don't come to us, we come to you. We are 100% mobile!
- Help the family organize and coordinate services and resources that may already be in place
- Be an additional support; an advocate who fights for the needs of the member to get what they need to succeed!
- Connect interested adults in the home to other services available at The Consortium (D&A, Outpatient, Employment services)

Our Case Managers support and advocate for the needs of the children and families we serve.

THE CONSORTIUM'S CHILDREN'S BLENDED CASE MANAGEMENT CAN HELP

Each child or adolescent is assigned an individual case manager who will work with the child and family to access and monitor services. The level of case management will depend on the child and family's level of need. Children, adolescents and families may be seen as often as weekly with a minimum of once-a-month face-to-face contact, depending on level of care needed. The level or type of case management service is determined by the intensity of each family's unique situation.

While focusing on the long-term future for your family, the main goals are to provide:

- Assistance accessing and maintaining community supports and services
- Coordination of care among providers, school districts and any other system your family may need
- Family Support tailored to assist individuals through times of need
- Development of Youth and Family Individualized Service Plans
- On-call Case Management available 24 hours/7 days a week for supportive assistance
